DISPONIBLES

## PULIDO

Superficie totalmente lisa y brillante que realza el color y la profundidad del diseño. Ofrece un aspecto elegante y sofisticado, ideal para espacios interiores que buscan un acabado de alta gama.

## HIGH GLOSS

Brillo intenso tipo espejo que aporta luminosidad y amplitud visual. Su reflejo destaca los detalles del diseño y crea ambientes modernos.

## MATE

ofrece una apariencia natural y moderna. Su textura reduce reflejos y realza la pureza del diseño, creando ambientes de elegancia, cálidos y atemporales.

## GRANILLO

Superficie con ligeras partículas granuladas que aportan textura sutil y efecto antideslizante. Su look moderno y robusto es ideal para áreas de alto tránsito o donde se busque un acabado más técnico.

## GUÍA ESENCIAL **SISTEMA DE COLOCACIÓN**

Guía práctica con los pasos esenciales para una instalación cerámica correcta y duradera. con recomendaciones simples para lograr acabados uniformes y profesionales.

### **BENEFICIOS:**

- Mayor durabilidad.
- Acabados más limpios y uniformes.
- Reducción de errores.
- Mejor adherencia y estabilidad.
- Aprovechamiento eficiente del material.
- Mayor resistencia al desgaste.

# INSTALACIÓN DE PORCELANATO:

- 

Prepara la superficie; debe estar limpia, nivelada y seca.  
Marca líneas guía para empezar derecho.
- 

Extiende adhesivo con llana dentada. Además para piezas grandes, pon una capa delgada también detrás de la baldosa.
- 

Coloca las baldosas, empieza en el centro o en un punto recto. presiona cada baldosa y usa espaciadores, por último revisa nivel y alineación. Haz los cortes necesarios.
- 

Deja secar completamente el adhesivo de uno a dos días.
- 

Aplica la boquilla, rellena juntas con fragua. Y luego limpia el exceso con esponja húmeda.
- 

Limpieza final, cuando seque, limpia la superficie.

Este informe solo representa las características de las muestras sometidas a prueba, más no de donde deriva y no podrá ser reproducido total o parcialmente sin la autorización por escrito del laboratorio. El aspecto del producto puede presentar variaciones del espectro, tono y textura respecto a lo expuesto, dependiendo del lote de producción. El ácido fluorhídrico ataca todos los productos cerámicos. Esta ficha solo es aplicable a lotes de primera calidad.
