Sistema de pared de losa sólida de madera **WPC**

PANEL DE REVESTIMIENTO

Nombre: Panel de pared WPC
Material: Polvo de nanofibra
Largo y ancho:
1220*2440 (mm)
1220*2800 (mm)
1220*Longitud personalizada (mm)
Espesor: 5 mm/8 mm/9 mm
Densidad: 0,7
Grado de protección ambiental: ENF
Clasificación de resistencia al fuego: B1
Rendimiento: impermeable y flexible

FOTOS *FÍSICAS*

Impermeable | Prevención de insectos | Protección del medio ambiente | Retardante de llama

Grosor: 5 mm y 8 mm

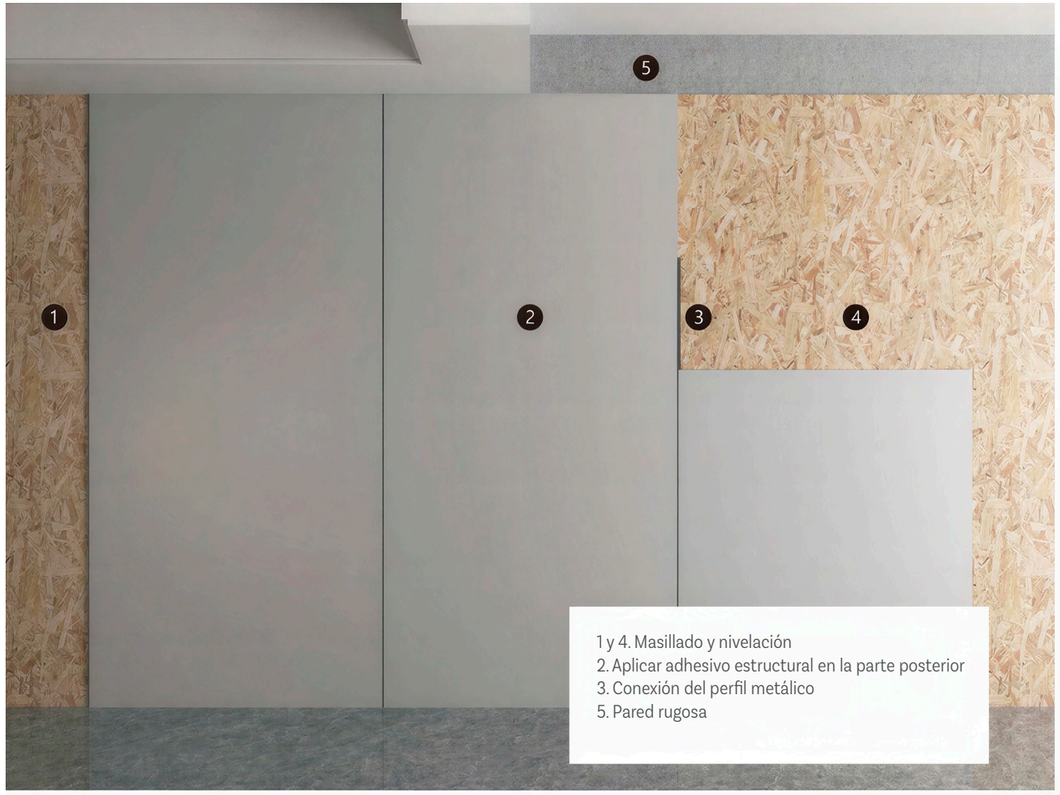

Doblable y moldeable

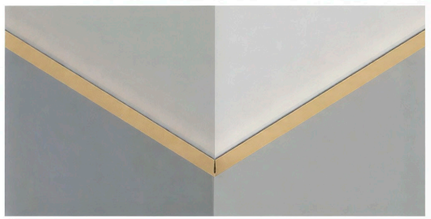

Impermeable y resistente a la humedad

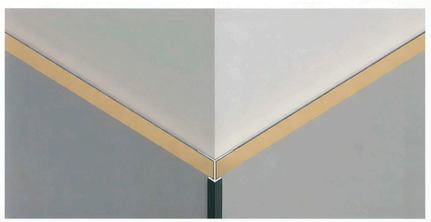

1 y 4. Masillado y nivelación
2. Aplicar adhesivo estructural en la parte posterior
3. Conexión del perfil metálico
5. Pared rugosa

1. Aplicar adhesivo estructural en la parte posterior
2. Conexión del perfil metálico
3. Masillado y nivelación

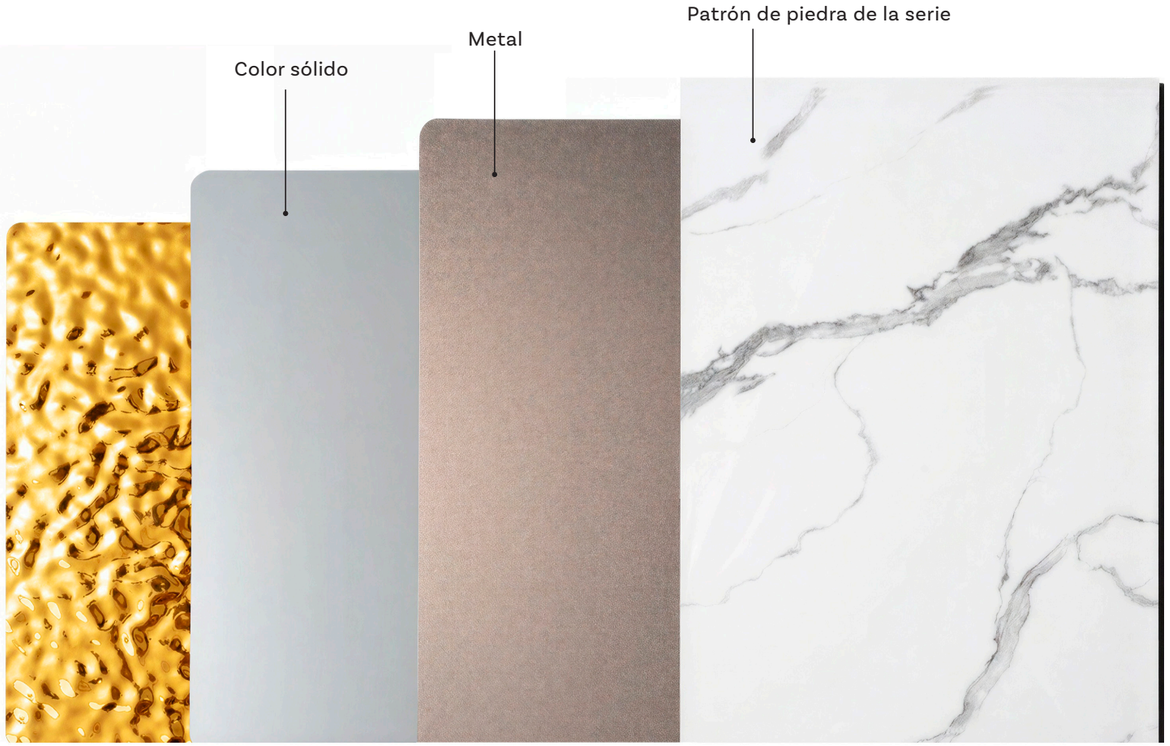

Ranurado y doblado de esquinas
1. Ranurado con máquina de recorte
2. Doblado con calentamiento mediante pistola de aire caliente
3. Aplicar adhesivo estructural en la parte posterior de la pared

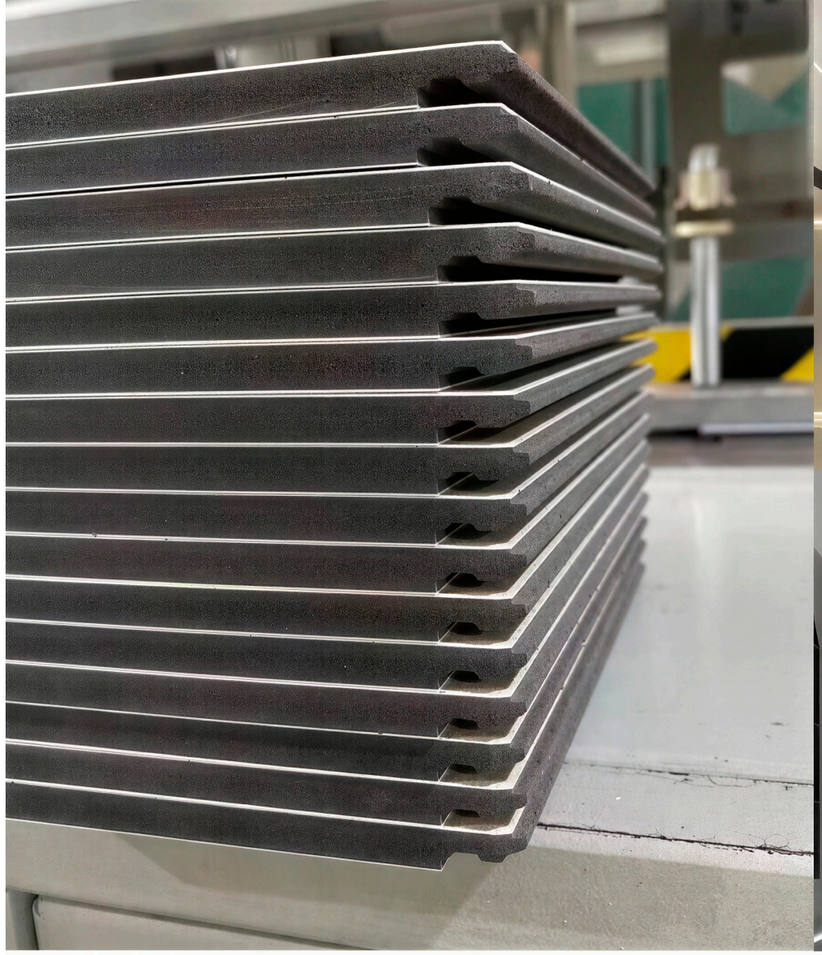

Aplicar adhesivo estructural en la parte posterior

SISTEMA DE PARED

losa sólida de cristal de carbono

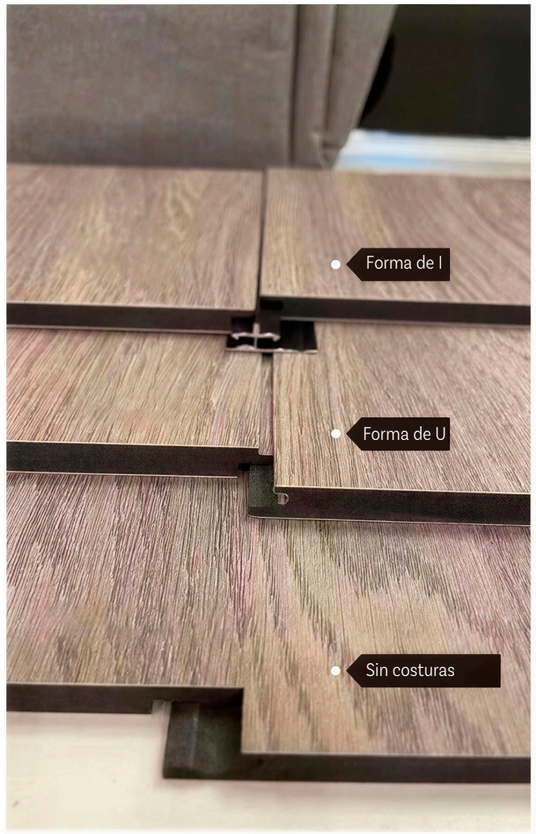

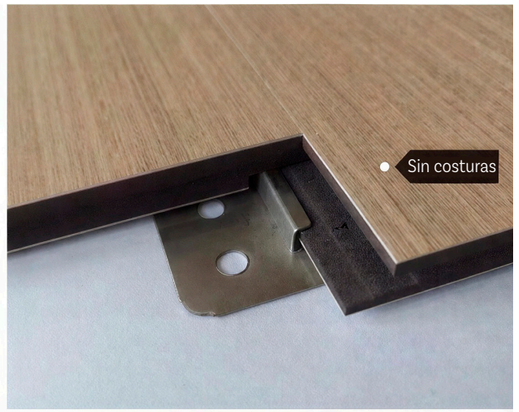

PANEL DE REVESTIMIENTO

Nombre: Panel de cristal de carbono
Material: fibra de carbono de bambú
Largo y ancho:
1220*2440 (mm)
1220*2800 (mm)
1220*Longitud personalizada (mm)
Espesor: 5 mm/8 mm/9 mm
Densidad: 0,7
Grado de protección ambiental: ENF
Clasificación de resistencia al fuego: B1
Rendimiento: impermeable y flexible

CARACTERÍSTICAS DEL PRODUCTO

Versión mejorada de tablero grande sólido de cristal de carbono

Fórmula de polvo de carbón activado
Descomposición de formaldehído y otros gases nocivos

Tecnología de extrusión de arco de placa
Dureza y luego fortalecimiento, no teme a los golpes

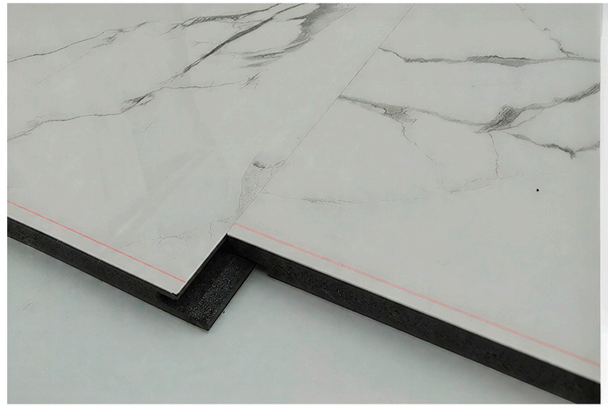

Múltiples métodos de empalme
No es solo coser cables

Material fino
El material de la superficie es exquisito y delicado
